

How to Add a Blog RSS Feed to Mahara Portfolio

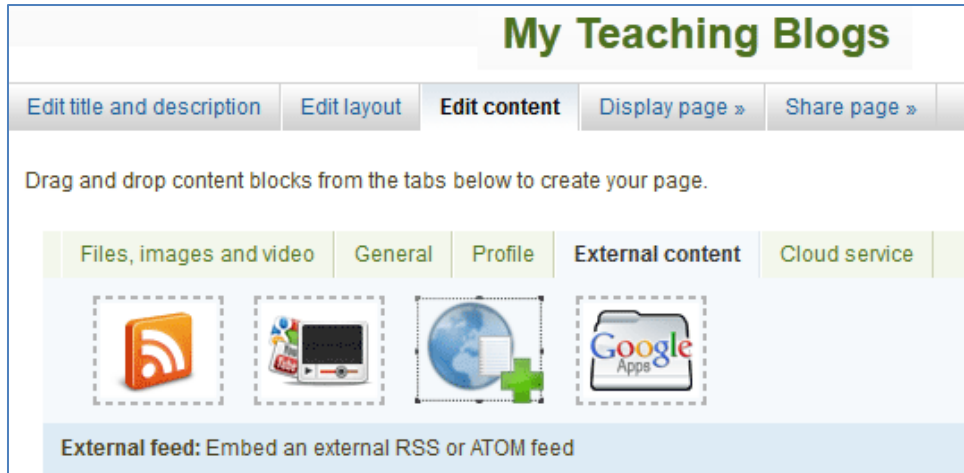

- Go to your blog, scroll to the bottom of the page and look for the text that says, *Subscribe to: Posts (Atom)*

- A new page will open with the address to the RSS feed.
 - An RSS feed is a link to an XML formatted version of your blog. This will allow the blog feed to update automatically where you use the link to the feed.
 - It also allows the blog site to display only the post, not the entire blog site, in another page.

- Copy the address of the blog feed from the address bar of the browser.
- Go to MAHARA and open the page where you want to display your blog.
 - You will need to EDIT the page.
 - Refer to the section on adding or creating pages or collection to your portfolio for further information on how to do this.

- Click on the EDIT CONTENT tab and then drag and drop the External Feed block to your page.

Blogger: Configure

Block title

If you leave this blank, the title of the feed will be used.

Feed location *

URL of a valid RSS or ATOM feed

Items to show

Between 1 and 20

Show feed items in full

Whether to show a summary of the feed items or show the full items

- These are the most important options for the blog.
 - You will see other options, which you can leave as default if you prefer.
- Paste the address of the feed into the FEED LOCATION box.
 - You may want to edit the layout of the page to allow for a wider column layout.
